

# Add VideoTouch AI to Your Home Screen

Get one-tap access to your dashboard — just like a native app. No app store required.

## iPhone & iPad (Safari)

1. Open **Safari** and go to **videotouchai.com**.
2. Tap the **Share** icon (square with an arrow pointing up) at the bottom of the screen.
3. Scroll down and tap **Add to Home Screen**.
4. Edit the name if you'd like, then tap **Add** in the top right.
5. The VideoTouch AI icon now appears on your home screen — tap it any time to launch.

## Android (Chrome)

1. Open **Chrome** and go to **videotouchai.com**.
2. Tap the **three-dot menu** in the top right corner.
3. Tap **Add to Home screen** (or **Install app**).
4. Confirm the name and tap **Add** or **Install**.
5. Your VideoTouch AI shortcut is now on your home screen.

## Samsung Internet

1. Open **Samsung Internet** and go to **videotouchai.com**.
2. Tap the **menu** icon (three lines, bottom right).
3. Tap **Add page to → Home screen**.
4. Tap **Add** to confirm.

## Tips

- Sign in once after installing — you'll stay logged in for fast access.
- Launching from the home screen icon opens VideoTouch AI in full-screen app mode.
- Allow notifications (if prompted) to get updates on your videos and leads.
